Cyber Warfare and Cyber Terrorism

Edited by: Lech J. Janczewski, University of Auckland, New Zealand and Andrew M. Colarik, Consultant, USA

Enormous efficiencies have been gained over the past twenty-five years as a result of the introduction of computers and telecommunications technologies. The use of these systems and networks translates into a major concentration and centralization of information resources. However, this consolidation creates a major vulnerability to a host of attacks and exploitations. **Cyber Warfare and Cyber Terrorism** reviews related problems, issues, and presentations of the newest research in this field.

Cyber Warfare and Cyber Terrorism provides in-depth coverage of cyber terrorism phenomena and its societal and organizational implications worldwide. Featuring contributions from noted researchers throughout the world, with years of scholarly and research experiences related to this rapidly expanding problem, this publication is a crucial reference source enabling libraries everywhere to meet information needs on this pressing topic.

“This book is a compilation of selected articles written by people who have answered the call to secure our organizational, national, and international information infrastructures.”

–Lech J. Janczewski, University of Auckland, New Zealand

Topics Covered:

- Access control models
- Behavioral information security
- Bio-cyber machine gun
- Cryptography
- Cyber stalking
- Cyber war defense
- Deception in cyber attacks
- Economics of cyber security
- Electronic money management
- Terrorism and the Internet

Special 20% Discount

ISBN: 978-1-59140-991-5

Retail Price: ~~US \$165.00~~ US \$132.00 h/c

564 Pages • June 2007

AUTHORITATIVE • INNOVATIVE • COMPREHENSIVE

Table of Contents:

Section I: Terms Concepts, and Definitions

Chapter I: Cyber Terrorism Attacks
Chapter IV: Bits and Bytes vs. Bullets and Bombs

Section II: Dynamic Aspects of Cyber Warfare and Cyber Terrorism

Chapter X: An Introduction to Key Themes in the Economics of Cypersecurity
Chapter XII: Deception in Cyberattacks

Section III: Human Aspects of Cyber Warfare and Cyber Terrorism

Chapter XXII: Electronic Surveillance and Civil Rights
Chapter XXIII: Social Engineering

Section IV: Technical Aspects of Handling Cyber Attacks

Chapter XXVIII: Cyber Security Models
Chapter XXX: Anti-Spam Approaches Against Information Warfare

Section V: Identification, Authorization and Access Control

Chapter XXXVI: Hacking and Eavesdropping
Chapter XXXVII: Access Control Models

Section VI: Business Continuity

Chapter XXXXV: Bouncing Techniques
Chapter XXXXVI: Cyber Forensics

Section VII: Cyber Warfare and Cyber Terrorism: National and International Responses

Chapter XL: EU Tackles Cybercrime
Chapter XLI: The U.S. Military Response to the Threat of Cyber Warfare

About the Editors:

Lech Janczewski has over thirty five years experience in information technology. He is an associate professor at the University of Auckland, Department of Information Science and Operations Management. His area of research includes management of IS resources with the special emphasis on data security. Dr. Janczewski has written more than 100 publications that have been presented in scientific journals, conference proceedings and books. He is the chairperson of the New Zealand Information Security Forum, a fellow of the New Zealand Computer Society, and the secretary of the IFIP's Technical Committee on Security and Protection in Information Processing Systems (TC-11).

Andrew Colarik has accumulated over twenty five years experience of knowledge utilizing computer information systems. This includes systems analysis and design, network administration, university level teaching, and the justification, specification, and implementation of factory and office automation. He is the holder of a PhD in information systems from the University of Auckland, and a masters of business administration from Kent State University. As a researcher, author, and inventor, Dr. Colarik has been published in top-tier security conferences, authored several information security books, and is an inventor of both utility and design patents.
