# THE HOME EXECUTIVE'S GUIDE TO COMPUTER SECURITY

AUTHORED BY ANDREW MICHAEL COLARIK

THE  
HOME EXECUTIVE'S  
GUIDE TO COMPUTER  
SECURITY

ANDREW MICHAEL COLARIK

### *What's Inside*

Whether you operate a home-based business or bring your company's business home, this book establishes a functional understanding of security, and teaches its application in securing personal computers in a home environment. It is a guide that takes the reader through the underlying vulnerabilities of computing and illustrates the security mechanisms needed to defend yourself. There truly are some simple solutions to solving complex problems in securing information, and this guide walks you through them.

### *About The Author*

Andrew Colarik holds a Ph.D. in Information Systems (Security) and a Masters in Business Administration (MIS). As a teacher, researcher, author, and inventor, Andrew has provided a wide variety of training and consulting services to business, legal, and law enforcement individuals on key security issues facing organizations today. With over twenty-three years utilizing computerized information systems, Andrew continues to provide simple, step by step explanations of the risks businesses face and how to protect systems from computer attacks.
